HEALTH INSURANCE CLAIMS

Insurance companies usually reject over 30% of insurance claims in Israel!

They have many reasons for denying claims, such as: statute of limitations, "non-disclosure" claim, non-compliance with the policy and more.

It is important to know that when it comes to health insurance claims, the decision of the insurance company can certainly be appealed. A well written medical opinion and professional legal advice, can certainly bring compensation from the insurance company.

HEALTH INSURANCE CLAIMS OUR SPECIALTY

Our lawyers specialize in lawsuits against insurance companies. They are able to closely examine, and often refute, the insurance company's claim that the lawsuit is unjustified. An application through a skilled lawyer will make it possible to change the decisions of the insurance companies and result in at least half of the rejected insurance claims being approved in the end.

LEGAL SUPPORT IN FILING THE CLAIM

It is important to understand that the insurance companies have a lot of experience in lawsuits in the courts and are represented by lawyers who are the leaders in the field. That is why it is very important to balance the power relations and to use one of our experienced lawyer in these types of claims.

The David File Law Firm is one of the leaders in Israel in the field of insurance claims and the firm's lawyers have obtained cumulative compensations of hundreds of millions of shekels from the insurance companies.
